

Coordinate the regenerative projects in Northern Italy and Eastern Spain with fruits producers for one of Pur Projet's client. Consolidate PUR Projet expertise on regenerative agriculture practices.

ABOUT PUR PROJET

PUR Projet is a pioneer in the development of nature-based solutions, in particular insetting. This revolutionary approach generates multiple benefits for a company and the ecosystems on which it depends. We are working to transform climate action from a niche activity to an industry standard. While regenerating ecosystem chains through regenerative agriculture (agroforestry, cover crops, low to no tillage, sustainable forestry, etc.), our projects improve the resilience of our partner farmers' and strengthen companies' supply chains. Insetting means assessing, reducing and offsetting a company's climate and environmental footprint by developing socio-environmental projects with positive impacts within its value chain and using them to build a sustainable society. In short, Insetting aims to reconcile companies with Nature. As a mission company, we optimize our resources to maximize our impacts.

More information in our [company presentation](#) and on our [website](#).

PUR Projet is looking for a Project Manager in Regenerative Agriculture (Italy)

The EUROPE team of PUR Projet is implementing and operating insetting, agroforestry and reforestation projects since 2012. To this date, hundreds of farmers and landowners benefited from the support of PUR Projet on behalf of major companies such as Accor, Caudalie, Clarins ...

In Northern Italy, PUR Projet is closely working with one of its client, a leader of the food industry sector, on the client's fruit supply chain. A 3 years project is starting in July 2021 with the objective of transitioning the supply chain towards regenerative agricultural practices. Most of the project activities will be implemented in Northern Italy with a scope of 370 farmers. A smaller part of activities will be implemented in North East of Spain during annual field visits.

We are looking for a dynamic, autonomous project manager with a master in agricultural/agronomic engineering to supervise the coordination of this strategic project. The project manager will be based in Northern Italy. He/She will be supervised by the Regional Manager Europe and will work in collaboration with the European project managers and officers. He/She will be involved in a non-exhaustive manner in :

- **The project coordination :**

- o Diagnostic of the local supply chain
- o Regenerative agriculture training design and dissemination for a scope of 400 farmers
- o Demonstration farm activities design, launch and follow up
- o Coordination with local stakeholders (cooperative, agricultural NGO, farmers, client...)
- o Individual visits and advices to farmers
- o Annual visits to Spain to disseminate regenerative agriculture trainings to a reduced scope (30) of farmers
- o Drafting of activity reports for internal and external contacts

- **Support to other PUR Projet teams**

- o Participation in commercial proposals in support of the programme teams
- o Strengthening of internal tools and procedures
- o Development of internal expertise
- o Representing PUR Projet at events and in professional networks

Profile :

- Master's degree in agriculture, with a passion for environmental issues.
- 5 years experience in project management and consulting on the optimization of agricultural practices
- Good technical knowledge of subjects related to regenerative agriculture.
- Knowledge of arboriculture would be an asset.
- Fluent in Italian and English. Fluency or knowledge of Spanish or French would be an asset.
- Attracted by young companies with a "start-up" spirit in strong growth.
- Dynamic, autonomous, with a strong commitment to the environment.
- Open-minded and able to work with all types of agricultural structures.
- Driving licence required

How can you apply?

Send your CV + short cover letter in English before the 3rd of May to louise.barreau@purprojet.com et maximilien.simon@purprojet.com with the subject "PM – Europe – Surname, NAME". Candidates who pass the CV stage will receive an invitation for a telephone interview, after which a final discussion with the European team will ensure that the candidate will fit in well with the team.
