

Coordinate the Data collection in Pur Projet : Ensure the connexion between the field team and the technical team to build a strong data collection ecosystem, define the roadmap for each country and share the tool knowledges.

## WHO WE ARE

PUR Projet is a global leader in supply chain sustainability. We develop socio-environmental projects within the supply chains of our Corporate Partners. Through the economic and social empowerment of local communities and the introduction of sustainable development initiatives at the agricultural level, PUR Projet seeks to address climate change, while regenerating and preserving the ecosystems upon which these supply chains depend. Many of PUR Projet's projects fall within the categories of insetting, regenerative agriculture, agroforestry, forest conservation and landscape restoration. PUR Projet is a B Corp Company which employs over 120 people and a presence in 10 countries.

## PUR Projet is looking for a Product Owner in Data Collection

PUR Projet manages different projects across the world and collects the data linked to those projects. The field teams monitor and follow each project around the world with different tools such as Kobo. All this data pipeline aims to improve our impact and our projects in the field. The IT department manages this data to build a strong data pipeline.

We are working in a complete ecosystem with:

- a collection solution and ETL to gather data in our central database
- a back office to manage this data and some reportings to present the results.

This work needs coordination and validation from the field team and the technical team to be sure the needs are answered with a global solution usable on all our projects.

To supervise the Data collection, we are looking for a dynamic and autonomous Product Owner based in Paris, open to travel in the field to collect the data and visit the operations.

The PO's responsibilities will include in a non-exhaustive manner :

### **Owner of the data collection :**

- Manage data collection roadmap & projects
- Coordinate data collection in an international team
- Be the focal point for all data collection needs
- Ensure the solution fits with the global needs of the company
- Train the teams to ensure a good level of knowledge on the solution
- Ensure data quality
- Drive the Data collection ecosystem maintenance and evolution

### **Be part of the IT Team**

- Participation in data collection tool support for users
- Ability to query a SQL database
- Ability to build reports

### **Profile :**

- 3 years experience in project management and as a Product Owner
- Project management skills
- Ability to build a solution and support it in front of field team
- Knowledge on SQL and Data visualization (Power BI)
- Knowledge on Azure and Talend is an asset
- Fluent in English. Fluency or knowledge in Spanish would be an asset
- Attracted by young companies with a "start-up" spirit
- Dynamic, autonomous, with a strong commitment to the environment

## How can you apply?

Send your CV + short cover letter in English before the 20<sup>th</sup> of November to [manel.ramdani@purprojet.com](mailto:manel.ramdani@purprojet.com) with the subject "[Data Product Owner] + NAME". Candidates who pass the CV stage will receive an invitation for a telephone interview, after which a final discussion with the IT team will ensure that the candidate will fit in well with the team.
